IX МЕЖДУНАРОДНЫЙ ВЕБИНАР

## ПРОБЛЕМНЫЕ ВОПРОСЫ ГЛАУКОМЫ: фокус на первичную закрытоугольную глаукому

### Controversies in Glaucoma: Focus on Primary Angle-Closure Glaucoma (PACG)

Dear colleagues,

The Russian Ophthalmologist Society, Russian Academy of Sciences, Burnasyan Federal Medical Biophysical Center, Nongovernmental Ecological Organization “GREENLIGHT,” and the Russian Society of Cataract and Refractive Surgeons (RSCRS) are happy to invite you to participate in the IX International Symposium “Controversies in Glaucoma: Focus on Primary Angle-Closure Glaucoma (PACG)” on November 6, 2020.

Every year, symposium “Controversies in Glaucoma” catches the interest of ophthalmologists all over the globe and attracts many participants. The symposium has been expanding and attracting more and more contributors, which has become possible through telebridges with ophthalmologists from other countries. The goal of the symposium is to expand and broaden the expertise of Russian medicine in the field of glaucoma diagnostics and treatment, as well as to establish a dialog between Russian and foreign specialists on the most complicated and controversial aspects of glaucoma.

This year’s symposium will be marked by the participation of international experts from the United Kingdom (P. Foster, A. Azuara-Blanco, G. Gazzard), Hong Kong (C. Tham), and China (X. Zhang). The project is authored and coordinated by Professor Natalya Kuryшева. The telebridge will be moderated by Professor Natalya Kuryшева, Professor Boris Maluygin, and Professor Vladimir Trubilin.

**Time and date:**

November 6, 2020

12.00 – 14.45 (MoscowTime)  
Telebridge  
Russia –UK – Hong Kong– China  
For detailed information please on the website:
